Applied Research Symposium

Introduction

Applied research transforms scientific concepts into practical solutions for real world challenges.

This symposium unites the Petroleum Research Center (PRC), oil companies, academic institutions, and industry experts to drive innovation, support researchers, and build infrastructure for advanced research. Together, we seek to promote sustainable growth and advance the future of the oil and gas sector.

Objectives

The main goal of this scientific event is to empower the PRC to fulfill its strategic objectives, advance the sustainable development of the national oil industry, and remain aligned with scientific and technological advancements. The specific objectives include:

- **Presenting the PRC's Strategic Plan:** Provide an overview of the Petroleum Research Center's strategic plan to effectively serve the oil and gas sector.
- **Highlighting the Role of Applied Research:** Emphasize the significance of applied research in addressing the specific needs of the Libyan oil and gas industry.
- **Encouraging Practical Applications:** Promote and enhance the practical implementation of research findings within the oil and gas sector.
- **Fostering Collaboration:** Establish robust and durable partnerships for cooperation between the PRC, oil companies, academic institutions, and relevant authorities, while strengthening partnerships with international expertise.
